

# Importance of health systems

Prof. Dr. Fabrizio, Tediosi

Swiss Tropical and Public Health Institute, University of Basel

The lecture will begin by highlighting the importance of utilizing a health system perspective to address global health issues and create sustainable systems. It will then delve into the utilization of Global Burden of Disease estimates to guide policy making and the difficulties in obtaining accurate global health measurement.

## GLOBAL HEALTH & WELL BEING

Measuring  
progress  
towards the  
United Nations  
SUSTAINABLE  
DEVELOPMENT  
GOAL 3

Fabrizio Tediosi is specialized in public health and health systems and policy research. He is Research Group leader at the Department of Public Health and Epidemiology of the Swiss Tropical and Public Health Institute and Professor at the Faculty of Science of the University of Basel. He is a research leader in health financing; developing and applying methods to evaluate and validate health interventions for delivering them at adequate levels of effective coverage; health policy analysis and evaluation; and the impact of global governance and policy on public health. He published over two hundred publications, including articles in peer reviewed journals, books, book chapters, and working papers.
